Office Action Summary	Application No. 10/552,474	Applicant(s) MCKEE ET AL.	
	Examiner JAWEED A. ABBASZADEH	Art Unit 2115	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-24 are presented for examination.

Specification

The disclosure is objected to because of the following informalities: Page. 7, lines 15-16 state, "initialization parameter **to the** if such a task is not being performed." This statement seems to be a typo and should be corrected without introduction of new matter.

Appropriate correction is required.

Claim Objections

Claims 1, 4, 5-8, 11, 14, 16-21, 23-24 objected to because of the following informalities: These claims contain variations of the word "initialise." It is suggested that the spelling of the different variations should be based on the word "initialize." Appropriate correction is required.

Claims 20-22 objected to because of the following informalities: These claims contain the word "programme." Is it suggested that this be changed to "program."

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 20-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 20-22 claims a "computer programme." This subject matter is not limited to that which falls

Art Unit: 2115

within a statutory category of invention because it is not limited to a process, machine, manufacture, or a composition of matter. Instead, it includes software per se. Software per se does not fall within a statutory category since it clearly is not a series of steps or acts to constitute a process, not a mechanical device or combination of mechanical devices to constitute a machine, not a tangible physical article or object which is some form of matter to be a product and constitute a manufacture, and not a composition of two or more substances to constitute a composition of matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiragaki US 2002/0162045.

As to claim 1, Shiragaki a computer system having a plurality of components that can be initialised, wherein each component is configured to produce status data from which the level of need for that component to be initialised can be inferred, the status data having a predetermine level of need associable therewith, and wherein at least one component is configured to: receive status data from other components; make a comparison using the status

Art Unit: 2115

data received from respective components; in dependence on the comparison, select one or more components for initialisation; and, issue initialisation instructions to the selected component(s) [0199-0205].

As to claims 16-17, 20, 23, 24, Shiragaki teaches these claims according to the reasoning set forth in claim 1 supra.
